## Mobile Training Centre

## On-site training of the highest standard

The **bernfixx**® Mobile Training Centre from Berndorf Band facilitates the professional on-site training of the customer's staff under the supervision of a certified trainer.

**No longer necessary to pay costly travelling expenses for staff**

**Reduced employee absence**

**No need for travel formalities**

**Training in a familiar environment**

**Discussion of company-specific topics**

## Application

When carrying out scheduled maintenance or emergency repairs, the maintenance staff of companies using steel belts are able to work with optimal efficiency only if they possess the necessary belt expertise. Experienced trainers at well equipped training centres in Austria and Thailand are in a position to teach the latest know-how in theory and practice. However, what if it is not possible to send your company's engineers there?

Thanks to its well thought-out, compact design, the **berndorf**® Mobile Training Centre contains all the equipment needed for comprehensive training. It can be used wherever it is needed – even on site at your company premises!

Certified trainers from Berndorf teach the basics of belt repair on three fully equipped workplaces. The theoretical tuition comprises materials and technology, measuring and testing technology, safety instructions and specifications of the **berndorf**® service equipment used for each application.

After positive conclusion of the theoretical and practical exercises on the training places, students work on belts installed in the **berndorf**® Mobile Training Centre.

Berndorf Band attests the positive completion of the training course with a certificate.

## Advantages

- 1) You no longer need to send your staff on costly trips to training sessions abroad.
- 2) This reduces employee absence (travelling time), and there is no need for time-consuming travel formalities (visas).
- 3) Training takes place in a familiar environment, ensuring stress-free learning.
- 4) Individual adaptation of training curriculum to each work environment.
- 5) After initial workplace training, realistic working conditions on sections of a steel belt.
- 6) Tuition by certified Berndorf Band trainers.
- 7) Safety instructions.
- 8) World-wide availability.
- 9) The customer only needs to provide a training room, cleaning agents, electricity and industrial gases.

We will be happy to design an individual **berndorf**® training programme for you customized to the specific needs of your company.
