W M P C

Are you looking for aggressive, high-speed cutting in dense materials such as solid wood, advanced polymer plastics, composites and non-ferrous machining. Built upon C.R. Onsrud's legacy, fixed-bridge platform, the **C-Series** design provides maximum rigidity for today's demanding applications. Twin table configuration allows for greater throughput - through the use of pendulum-processing - while allowing the flexibility to accommodate larger parts. When your application requires the accuracy, acceleration and performance of a ball screw positioning machine, you need the **C-Series**.

C.R. ONSRUD

AMERICAN-MADE CNC MACHINERY

Real. American. Originals.

You need CNC machines with the speed, accuracy, reliability, durability and flexibility to grow your business. The C-Series delivers that and more.

122C

Table

Overall

	Inches	Metric		Inches	Metric
X	60"	1524mm	L	132"	3353mm
Y	120"	3048mm	W	200"	5080mm
Z	11"	279mm	H	86"	2184mm

146C

Table

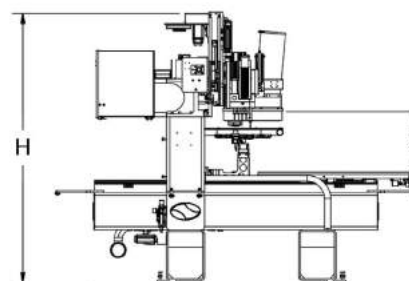

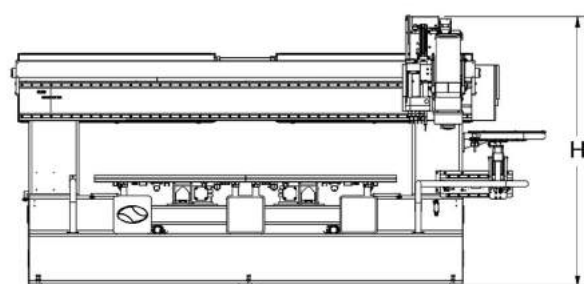

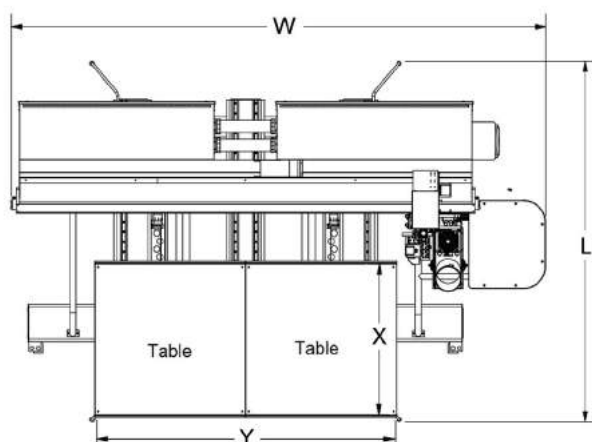

Overall

	Inches	Metric		Inches	Metric
X	60"	1524mm	L	131"	3327mm
Y	144"	3658mm	W	208"	5283mm
Z	11"	279mm	H	86"	2184mm

C-Series Features:

	Standard	Optional
Spindle (S6):	18HP / 13.5kW	24HP / 18kW
Max RPM:	24,000	24,000
Control:	Fanuc 0i	Osai OPEN, B&R
Tool Management:	12-Pos. Rotary	(2) 12-Pos. Rotary
Material Control:	Vacuum Holding	Mechanical
Material Handling:	Manual	Automation
Additional Items:	Aggregate Capable Auto Tool Measurement Drill Block (4,9,14,18) Robotics Integration Automatic Machine Lubrication (Tool MQL) Minimum Quantity Lubrication	Air Blast / Cold Air Blast C-Axis Labeling

All features are subject to change based on Options Schedule.
