

CNC

Dimar manufacture a wide range of tools for CNC machines, this includes solutions for both basic and advanced applications. The tools are designed to allow the assembly of a range of different profiles on one standard body.

- All CNC tools are produced from high quality steel.
- High quality carbide tips, adaptable grades to suit cutting requirements.
- Exclusive Dnamic™ solid carbide spiral tools for abrasive materials.

The use of Dimar CNC tools can enhance the optimum performance of the CNC machine.
