Staircon®

CAD/CAM software for stair design

Staircon is designed to provide the best possible support for a simplified and cost effective production of stairs – from sales to production. The powerful and user-friendly software enables fast design of standard stair shapes as well as flexible design capabilities for advanced stair shapes.
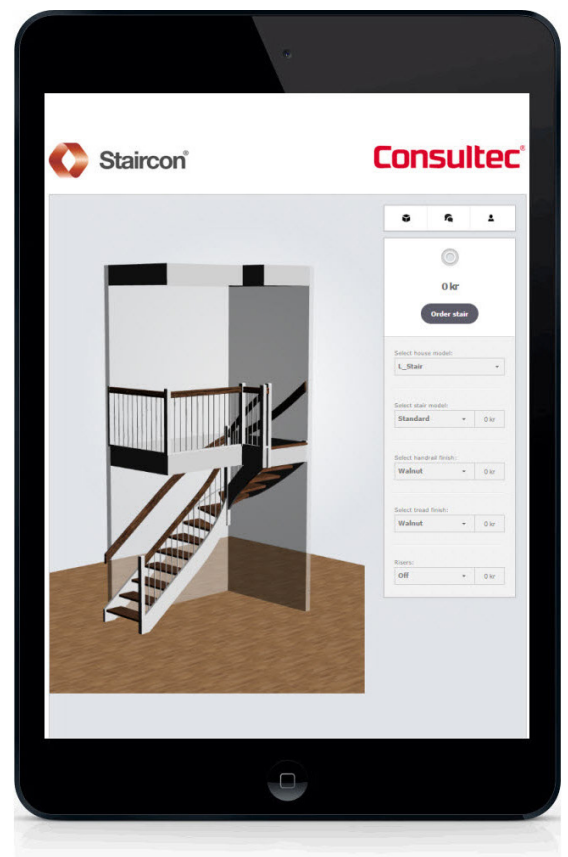

Easy to use

Staircon is developed for Microsoft® Windows, an environment familiar to most users. The intuitive graphic user interface is well laid-out, easy to learn and easy to use.

Support, all the way

Technical support is part of the success of any CAD/CAM software. Together with our sales partners around the world we have a strong organization to provide support to our customers. Staircon support is easily accessed through the "send-to-support" function in the software. Support is provided by email, with movie instructions and on-line support.

Future-proof stair design

Staircon is continuously developed by our team in Sweden. We believe that stair design will keep on evolving, and that new production methods and modern technology will advance innovations even further. The first version of Staircon was released in 1999. Ever since, it has been our aim to provide the best software on the market for stair production.

Consultec®

Designed to fit the needs of your company

The modular architecture of Staircon enables you to add functionality to the software as your business grows or needs change. Staircon is offered in different license levels with feature-sets ranging from web-based presentation to advanced CAM-production.

The power of software can only be experienced if it is tailored to your own needs and methods. The ability to customise Staircon to the client's methods of production is one of the reasons for it's great success.

Go to www.staircon.com/gallery to view a collection of stairs designed with Staircon.

Product menu

- Staircon sales; Design and sales with 3D view.

- Staircon Professional; Efficient and well-coordinated work preparation for manufacturers using full-scale print-outs.

- Staircon showroom; Web-based 3D catalouge.

- Staircon CAM 3/4; Link to 3 or 4 axis CNC machine.

- Staircon CAM 5; Link to 5 axis CNC machine

- Staircon CAM 5+; Link to 5 axis CNC machine, inluding arc details and Z-risers.

- Add-on option CAD; Export 3D; COLLADA, IFC 2x3

- Add-on option CAD; DXF export. Staircon Professional in combination with dxf export is used by CNC manufacturers who has a generic CAM software.

- Add-on option CAD; Pricing

- Add on option CAM; Fixture positioning

- Add on option CAM; step split
