ImPrint

WHY USE LABELING IN MANUFACTURING?

Labeling parts as they move through production can significantly improve how you organize and track those parts.
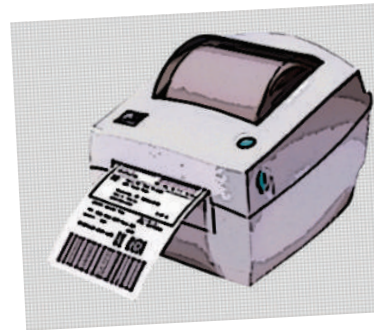

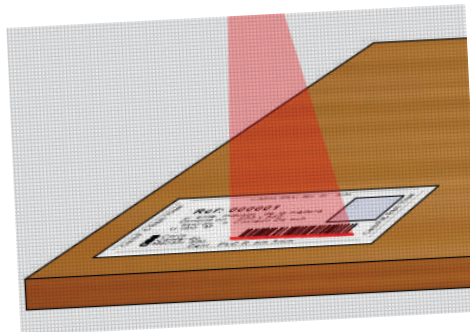

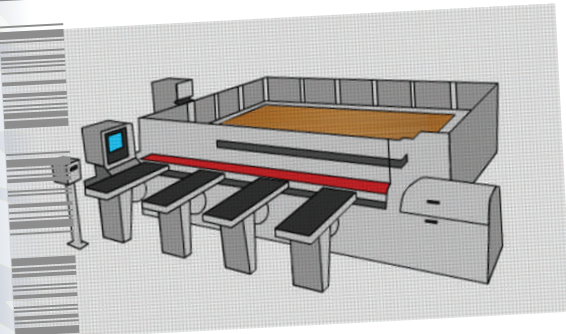

Labeling can:

- streamline operations
- eliminate unidentifiable parts
- communicate parameters
- provide reliable tracking for a scrap management system

① REAL-TIME

Print part labels as you cut!

With Real-Time, you enable label printing synchronized with part production at the saw. This virtually eliminates mislabeled parts and the associated down-time required to get back on track.

THE BETTER ON-DEMAND SOLUTION

- USE ANY DATA-SOURCE FOR LABEL DATA
- PRINT PER PART OR PER STACK
- 2D BARCODING SUPPORT
- MODERN GRAPHICAL INTERFACE
- FAST IMPLEMENTATION

2

ON-DEMAND
Print the labels you want, when you want!

With **ON - DEMAND**, labels are printed for specific parts as they are selected by the user. The software is touch-screen compatible: Just touch a part of the screen to print a label for that part.
