

# Hot Melt Hoses

The compatible solution

## The flexible connection for your application systems

- The flexible hot melt hoses with diameters of 6, 8, 13, 16mm etc. in all lengths required are system-compatible with brand standard and exchangeable.
- The advanced design complies with market requirements. The hot melt hoses are a brand product manufactured in Germany.
- The hoses are produced according to your demands.
- FE-MA-TECH hot melt hoses are the qualitative solution for better hot melt transport and feature an excellent temperature stability.
- Transport of hot melts and other thermoplastic products by applying highest pressure is not a problem. All types are highly resistant to pressure.
- On request and indicating the contact assignment we deliver according to your specifications.
- We have many hoses available for you in stock. If not, we can deliver you the requested hose within just a few days.
- You can also buy hot melt hoses of other manufacturers from us, but comparing price and performance will facilitate your decision.
