

Henan Huanghe whirlwind Co., Ltd., founded in 1978, is a well-known manufacturer of super hard materials in the world. As the key high-tech enterprise, Henan Huanghe Whirlwind Co., LTD., listed on Shanghai Stock Exchange on November, 26, 1998, was considered as the largest super hard materials production base in China. We are specialized in manufacturing products in 6 main industrial fields, covering super hard materials and tools, super hard composite materials and tools, metal powder.

Precision cutting tool division, affiliated to Henan Huanghe Whirlwind Co., Ltd., is a technology innovation company, specialized in research, development and production of precision cutting tool materials. We have strong product quality control and new product development capabilities. To ensure the stable quality, we are having scanning electron microscopes, electron probe, X ray diffractometer, ultrasonic microscope, cobalt magnetic instrument and other advanced analysis and detection equipment,

The super hard composite materials are with high stability and reliable quality. The main performance index has reached international advanced level. PCD cutting tool blanks are widely used for the machining of non-ferrous metals and alloys, such as aluminum, copper, aluminum/ gray

iron composites, as well as nonmetallic materials such as wood, chipboard, ceramics, plastic, rubber etc, where high abrasion resistance and good surface finish are required.
