

### Perfect Surfaces for the Industry

WAGNER is a leading manufacturer in the market for high technology, high quality equipment and plants for the application of powder lacquers, paints and other liquid materials onto surfaces. WAGNER is the only supplier in the industry supplying both industrial concerns and contractors and also consumers – for more than 50 years.

Worldwide the WAGNER Group develops, manufactures and markets high quality products and innovative solutions with forward-looking technologies. We are always there for our customers where they need us. Our global distribution and service network makes the WAGNER Group a leading supplier in the surface finishing market.

### Cost-effective and strong in performance

Perfect solutions, tailor-made to your requirements. Whether liquid or powder application, for each surface we find the right coating system. From small batch with manual coating to complex units for large series production. Our innovative and reliable products „Made in Switzerland“ make us a trusted value added partner for industry.
