V-Speed Gun Drill

The "V-Speed Gun Drill" is the right choice for deep drill holes in soft- and hardwood. While with conventional wood drills, deep holes can only be drilled laboriously with repeated chip removal, the new "V-Speed Gun Drill" with a specially developed single-spiral V-groove shape enables drilling in one working stroke. Thanks to the polished chip space, chip evacuation and performance are significantly improved. Despite the single-spiral design of the V-shape, the drill bit has a high basic rigidity and therefore does not tend to deviate in the wood; thus exactly straight and deep drill holes are possible.

The drill bit is manufactured from high-strength and hardened HSS steel, and thus has an extremely long lifetime compared to standard wood drills.

Available in the following dimensions:

Total length 150 mm (6"): Ø3 mm (1/8") to Ø10 mm (3/8")

Total length 250 mm (10"): Ø3 mm (1/8") to Ø16 mm (5/8")

Total length 315 mm (12"): Ø4 mm (5/32") to Ø16 mm (5/8")

Total length 460 mm (16"): Ø5 mm (13/64") to Ø16 mm (5/8")
