A WORLDWIDE SPECIALIST OF
Customized sawmill solutions

Bandsaw TECHNOLOGY

Brenta bandsaw technology stands for thin kerf saw, economical processing of all type of logs diameters and flexible sawing from log to log (timber coniferous, leafy or exotic).

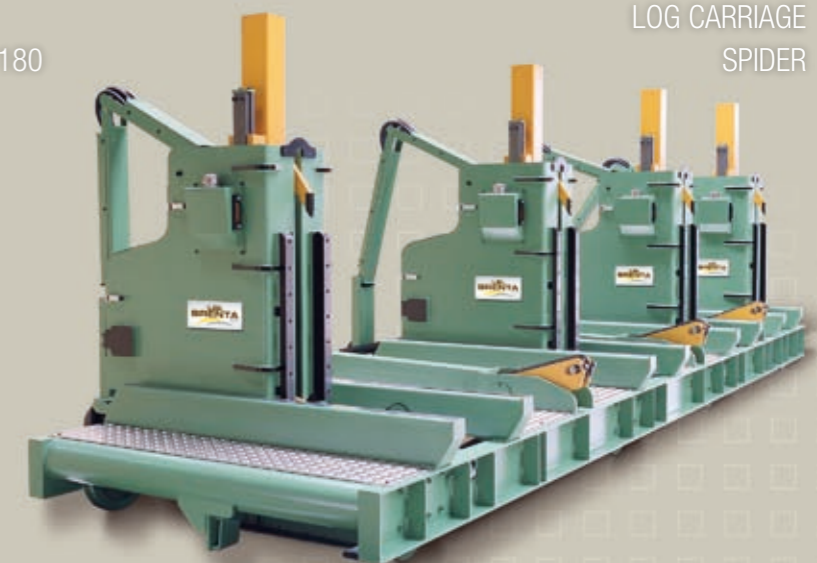

With high feed speeds the bandsaw technology satisfies both highest recovery and highest production volume demands.

EFFICIENT SAWLINES

The circular technology stands for high production and provides the best lumber surface quality and sawing accuracy.

A user friendly computer helps the operator to choose individual cutting patterns in order to reach the highest recovery.

Brenta Circular Saw equipments combine flexibility and sturdiness.

THE PASSION OF SAWING

BRENTA, founded over a century ago, has prospered thanks to right choices and management methods.

Over the past few years, the company has renewed its range of products step by step, focusing on quality and high efficiency. Technical choices are standardized as much as possible so as to control production costs as well as possible.

Nowadays, the company can look confidently into its future and that of its customers.

YOUR PARTNER FOR CUSTOMIZED SOLUTIONS

Take advantage of our experience and reliability. Our sales engineers and our design offices (mechanical, electrical and electronics) will bring you customized solutions in order to meet your requirements.

AN AMBITIOUS GROUP

Whilst retaining the creativity, speed of response and dynamism of an SME at the service of its customers, the SEEB Group has become a significant partner to major principals.

It is capable of providing a complete service in the fields of mechanical engineering and of industrial process controllers for the French and international markets, in all sectors: Wood, Automobile, Aeronautic, Iron and Steel, Robotics, Transport, Nuclear, Armament, Household appliances, Medical, Textile, Public works, Graphic industry...
