

MARUNAKA TEKKOSHO INC.

Innovative production technology for the production of novel wood-based panels (WBP) et al.

STORCH INDUSTRIE-ANLAGEN GmbH <https://storch-ind.com/> is the exclusive EU-representative of MARUNAKA TEKKOSHO Inc. for their **State-of-the-Art** lengthwise slicing technology.

MARUNAKA has many years of experience in the design and construction of special woodworking machinery.

MARUNAKA has been manufacturing patented lengthwise slicers for well over 50 years. The machines are CE-certified.

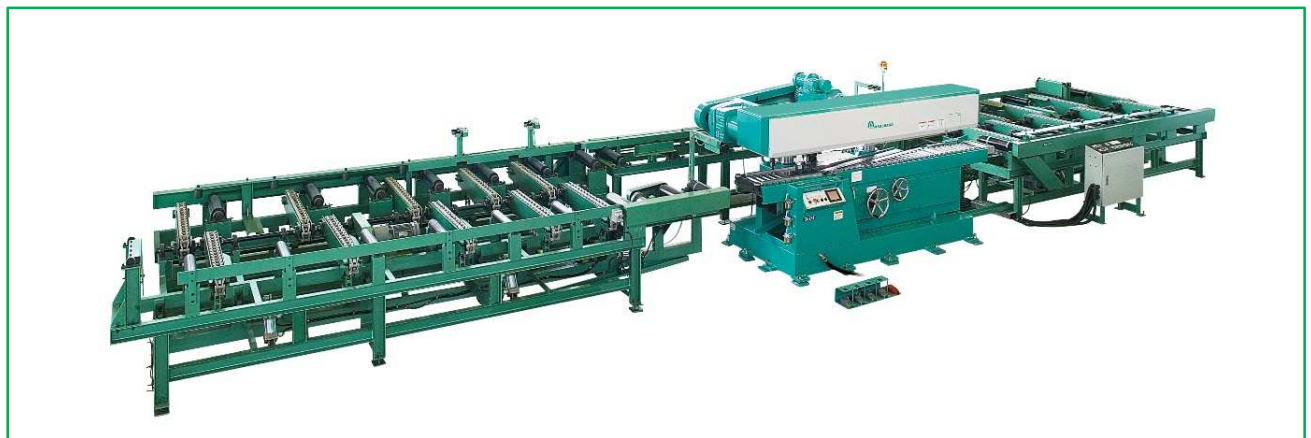

The solution for the future: lengthwise sliced lamellae (slats) for the parquet flooring industry but also others e.g. like for the production of WBP.

Highest feasibility, max. raw material recovery, no saw dust, a safe concept.

Lamellae dimensions: thicknesses ~2.50 – 5.50 mm, width up to max. 500 mm, lengths ~1,50 – 6,00 m (up to endless).

All kind of timber species can be sliced in wet condition.

Production capacity depend on individual concept ~500.000 m²/a up to 5 mio.m²/a.

MARUNAKA special high-speed lengthwise slicing machine, incl. fully automatic Merry-go-Round System (flitch transport system).

Your exclusive MARUNAKA EU-representative <https://storch-ind.com/>.

Further information can be obtained from your MARUNAKA competence-team at our booth. We look forward to your visit and, of course, anytime about your enquiry.
