

HF Generators
Customized HF Pressing lines

Strong Bonds Is Our Speciality

The Obel-P Group is one of the leading producers of machines and production lines for the woodworking industry. The group consist of 3 companies each of which is focused on providing their specific core competences to the customers. Therefore they each have their own dedicated design and production teams.

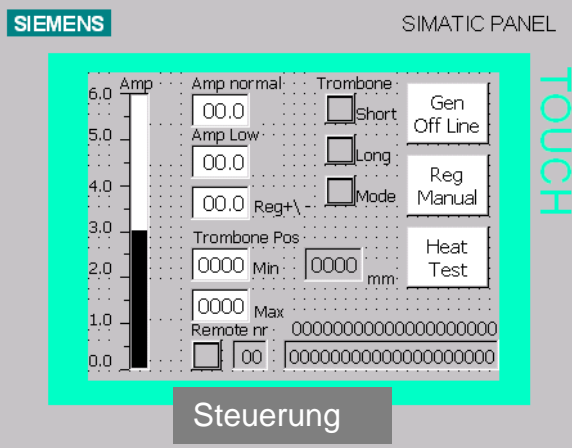

Obel-P Production Lines are customized to match the requirements of each individual customer. Thus, a targeted investment is possible to maintain an optimum balance between economic efficiency and technical specifications. According to the needs of the client systems are available in all performance categories.

Turn Key Customized Production Lines for Decades

We want to be your preferred Partner for High-End Machine Building and Production Development.

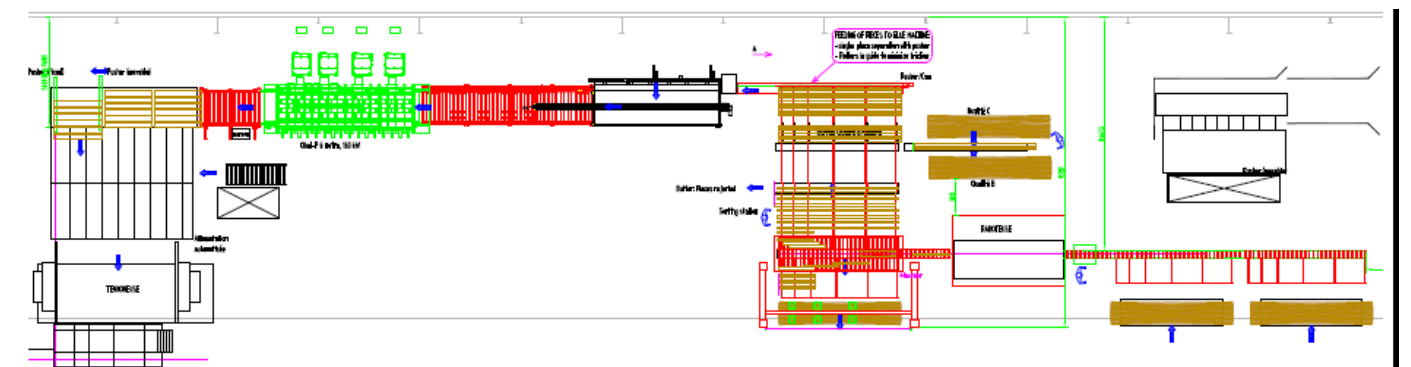

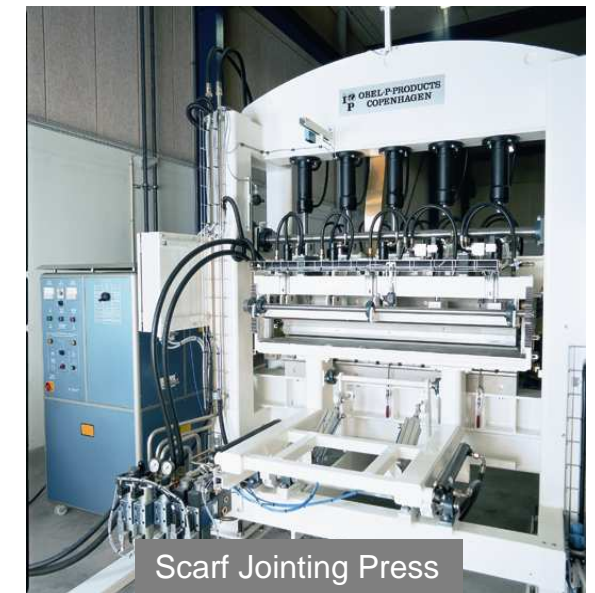

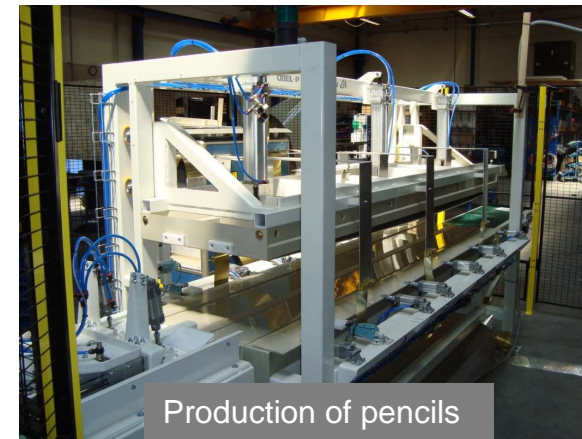

HF-Generators and technology:

Obel-P Generators since 1956
 Output 40-200 Kw
 Symmetric output
 Frequency 13,56 MHz
 Fully automatic power control
 PLC controlled
 Air cooled

Customized HF Pressing lines (Some examples)

Generators from 5 KW
 Semi- and fully automatic
 Own construction and development
 Own soft ware department
 PLC Siemens or Beckhoff
