

Tons of Storage in Small Spaces – Organised by OHRA

Optimise your workshop!

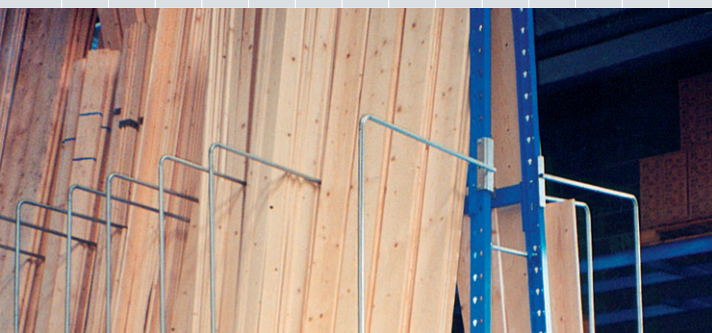

Storage Systems for Joiners and Carpenters

Satisfying forever changing customer demands in terms of quality, individuality, cost, and delivery deadlines can create havoc with workshop workflow efficiency.

OHRA storage systems for joinery and carpentry workshops provide valuable assistance to help cope with the strain of optimising your storage and working areas.

Store your valuable woodworking materials close to hand and according to type and size: Don't waste time and money searching for material. OHRA storage systems provide organisation even for the smallest of spaces.

All modular racking systems are custom-fitted to match existing floor space and to integrate into your workflow. OHRA storage systems can be extended or retro-fitted at any time, and are just as durable as your most valuable wood.

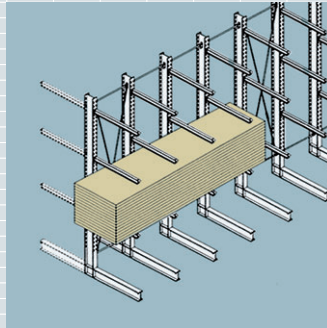

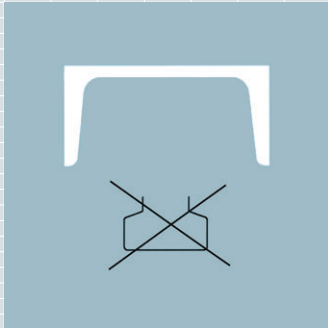

- Providing easy access to all material
- Space saving storage of all material sizes
- Save valuable workflow time
- OHRA systems help organisation
- Top quality – built to last
- Modular design
- Many colour finishes available

Make space so you can work!

Increase your productivity with effective and efficient storage solutions, so you never have to search for the right goods again – and find whatever you need with OHRA!

The OHRA promise

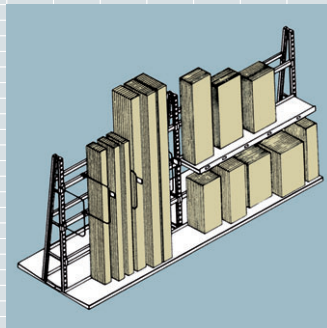

Racks made from hot-rolled steel are a guarantee for durability and safety in the workshop – for your return on investment.

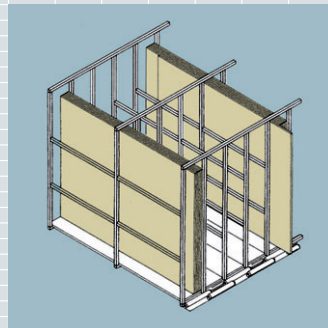

OHRA-Profiles: Robust, durable, heavy duty loading capacity, flexible.
