

## Schuko – driven by air flow

With 200 members of staff in seven factories, Schuko has been manufacturing exhaust and filter systems for nearly 50 years. As one of the leading European experts, we offer you innovative technology made in Germany presenting customized solutions which set benchmarks in performance and profitability as well as in reliability and long service life.

Schuko is a family-owned company and has always maintained close relationships with customers. The staff in the subsidiaries of Schuko meet this standard every day contributing their know-how, experience and comprehensive service.

The clientele includes tradesmen, medium-sized companies and even the large-scale industry. High satisfaction of our customers in a large number of branches confirms that we are on the right path to future continuous growth within Europe, our core market, and beyond.

## Closeness to customers – the way to top service

We offer you an excellent service so that your Schuko system will completely fulfil all expectations: competent, individual, on schedule. Our networked locations all over Germany allow us to establish manufacturing centres thus shortening production delays and delivery periods. Furthermore, in the case of malfunction quick response of our customer service is guaranteed. This will save time and money and you can rely on optimum availability of your production.

Moreover, we offer architects and major customers assistance with the compilation of bidding documents, the issue of exemption certificates and the identification of funding bodies abroad.

## Quality and safety made in Germany

Whether we are talking about wood, paper, plastics or metal, whether in the traditional handicraft business or in industrial manufacturing – many of today's manufacturing and processing procedures cannot be accomplished without powerful exhaust and filter technology.

Our customers benefit all the more from the many years of international experience and the interdisciplinary know-how within our company. The modular system architecture of our exhaust and filter systems is exemplary for both.

They feature the high quality standard of proven components, while being exactly adapted to the respective field of application, and can be subsequently modified or extended, if necessary. Furthermore, they comply with all national and international environmental protection and occupational safety standards.

As a member of the VDMA (Verband deutscher Maschinen und Anlagenbauer e.V. - comparable to the ASME = American Society of Mechanical Engineers) we comply to the highest of safety standards and employ state of the art technology in our extraction plants.

## Our range of services is thoroughly convincing

From the tradesman to the industrial enterprise, from large-scale dedusting to detailed solutions, Schuko designs, manufactures and assembles highly efficient exhaust and filter systems for any field of application in a wide variety of trades.

Whether it is wood working, paper and printing, metal processing, mould and model making, carbon processing or recycling industry – Schuko represents innovative, powerful solutions which are convincing because of their optimum safety in the workplace and for the environment.

## We are there to support you at each stage of the project

The success of our products is based, in particular, on product and a high level of service quality – we are there to support you at each stage:

### **Consultation**

We show you possible, appropriate solutions and provide advice when it comes to making decisions.

### **Planning and project development**

We draw up a first concept on the basis of the available project data.

### **CAD drawing**

In addition to the performance profile including all relevant technical performance characteristics, we prepare a CAD drawing.

### **Offer and order**

The next step is a detailed offer including time and delivery schedule. After definite placing of an order, your project will be immediately passed on to the departments in charge in our company.

### **Manufacture, delivery and assembly**

Careful manufacture as well as delivery and assembly on schedule are a matter of course for us. This gives you maximum security for your project planning. The Project Manager in charge will keep you up-to-date at all times.

### **Commissioning and staff training**

We accompany you through the entire commissioning and instruct your staff on operating the system.

### **Maintenance and after-sales service**

Regular inspections maintain optimum performance and durability of your Schuko system and help to save costs and energy. If in the course of time an extension or modification of your system becomes necessary, we will be there to support you.

## That's what we mean by service!
