

**Reliability
through Quality,
Performance and
Service.**

Company founder
Peter Möhringer

Our customer service: the secret of success for 4 generations.

Your partner for solutions with technical excellence

Benefit from our many years of experience. Our manufacturing skills mean that "Made in Germany" - offers products produced to the highest standards.

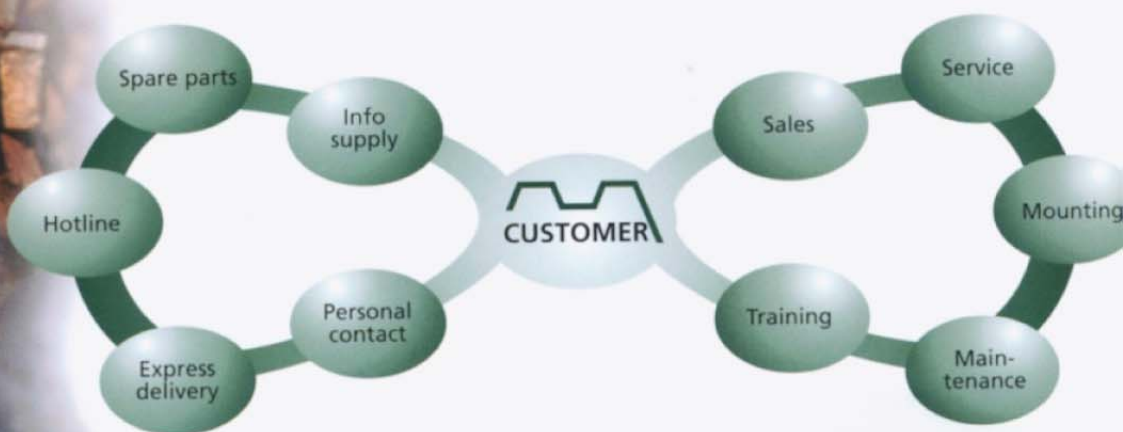

Whatever you need - our highly skilled engineers will develop concepts to suit your individual standards.

You will be supported by our staff throughout the entire project - from planning through implementation to ongoing support after successful installation. As a Möhringer customer you will enjoy a wide range of additional services such as our hotline, training programmes and symposia.

Security for the future

We have a strong focus on extending and developing our high-quality range of woodworking technologies for your benefit. Continuous research and technical innovation are the foundations of our future.

Whether in Germany, Europe or overseas - we are at your service whenever you need us.

Peter Möhringer

Fritz Möhringer

A century of success

In 1885, more than a century ago, Peter Möhringer laid the foundation stone of the company in the form of his small blacksmith's shop in Feuerbach. He started by repairing agricultural machinery, and his business rapidly developed into a production facility for high-quality steel frame saws for mills at the nearby Steigerwald forests.

Targeted expansion

Professional, reliable, innovative: every generation of the Möhringer family brought the company success. In the 1920s, Peter's son Simon Möhringer introduced the mass production of frame saws.

Peter and Fritz Möhringer, the third generation to run the company, pushed the mechanisation of sawmills in the 1960s and extended the manufacturing range by introducing log yard equipment.

A milestone in the company's development was the foundation of a second production facility at Wiesentheid in 1972. This is now the company's headquarters. During the subsequent period, traditionally-based Möhringer has developed partnership based relationships with sawmillers both at

home and abroad. Meanwhile, Simon and Stefan Möhringer, the fourth generation, have taken over the management of the business.

Exclusive products all over the world.

Our product range has been continuously expanded. We are especially proud of a large number of innovations and patent applications in frame saw, circular saw and chipping machine technology.

This year our range has been completed by the introduction of our new product line "Braun-Canali band saw technology".

Today, we are present all over the world as a turn-key supplier of wood-working technologies.

Stefan and Simon Möhringer

In demand world-wide for individual solutions.

Tailored solutions

Our aim is to prove optimum solutions to meet the highest demands.

Our experts therefore make a detailed and reliable analysis of your personal requirements. Our collaboration then results in the development of the optimum system.

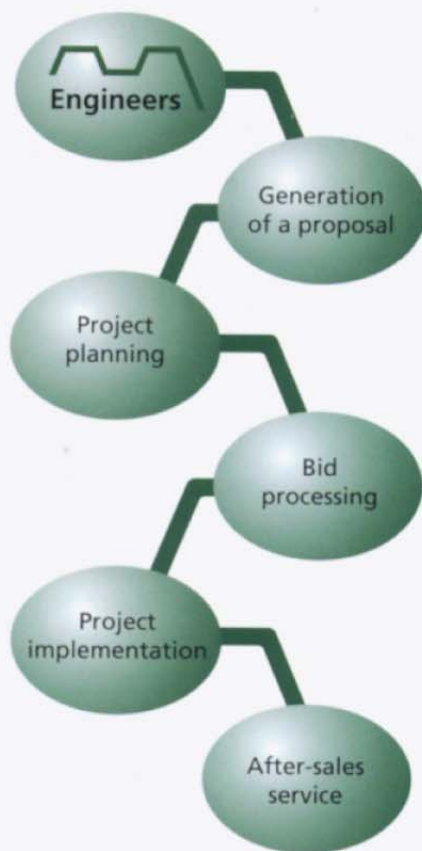

Personal care

We give top priority to individual consultancy and service. Personal contact will be available to you throughout the entire project; he will support you in the planning phase and during installation and commissioning.

Full-line service

As a Möhringer customer, you will enjoy our full-line service. It doesn't matter whether you are having your system serviced, repaired or extended - you will always have our support. The reliability and cost-efficiency of your system is thereby ensured. Our staff will also be pleased to advise you on future developments. National boundaries have less significance than ever before. Forward thinking companies are operating

internationally. Consequently, Möhringer technology is now operating in over 25 countries. Together with our strategic partners we offer the same high quality throughout the world, to ensure the thorough planning, commissioning and maintenance of your systems.

Leading edge technology, internationally

The varying requirements of every international market are a challenge to us. World-wide, our technology ensures efficient wood processing, for example

• Processing short logs:

A fast infeed system, a special 8-roller frame saw and a chipper canter version for pallet production ensure efficient processing of short logs.

• Curve sawing:

Special frame saw curve sawing devices from Möhringer ensure cost-effective processing of "problem timber".

• Complete systems for secondary processing

Automatic edgers with integrated cross cut stations guarantee high performance and maximum yield.

Made by Möhringer - Secure your future with quality products.

Möhringer systems are synonymous with high yield and low labour input. Our research and development team work hand in hand with our commercial staff to ensure that the most recent technology is incorporated in your production process.

High-tech woodworking

We offer you the entire range of modern sawmill technology:

Circular saw technology

Automatic edgers with camera or laser measurement for several applications, e.g. as:

- an all-round machine
- a high-performance edger
- a quality-orientated edger for secondary processing.

Chipping machine technology

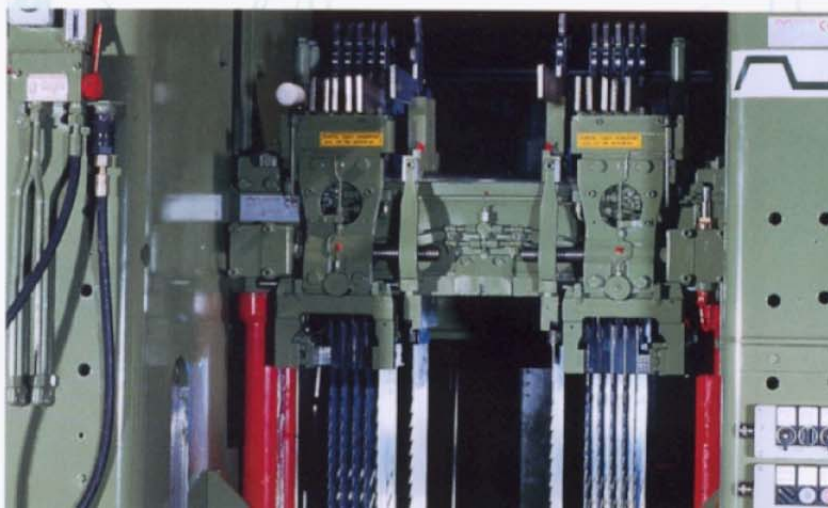

The latest developments for the best surface and recovery.

Double arbour units

High flexibility due to up to five variable cutting widths and a very fast setting system.

Frame saw technology

Multiple-width adjustment (multi-BV) for increased flexibility and the use of up-to-the-minute control technology for improved performance.

Exclusive solutions

Use the technical benefits of our systems, unique in quality and performance. "Made by Möhringer" is the slogan on many patent applications currently in progress.

- **The automatic frame saw line:**
Fast infeed and outfeed system.
- **The automatic band saw system**
Log feeder and process control.

Meticulous workmanship

"Made in Germany" - is a feature of our systems. From planning through installation up to final delivery, all our manufacturing is in Germany and will meet your highest expectations.

Rapid order processing

Time is money. So we complete your orders quickly and reliably, facilitated by efficient work processes and rational stock management. For example, the individual components of our systems are produced in small series for stock, so that they will be available straight away when we build a system.

Up-to-the-minute technology

High precision with cost-efficient manufacturing: made possible by the use of CNC technologies.

High quality

Our systems are inspected before they are used at your facility. Therefore, all systems are pre-assembled and tested under practical conditions before they leave our factory.

Progress in Team - skilled and motivated staff for high performance and service.

In the same way as all the gears mesh in our Möhringer systems, our staff work hand in hand. It is our shared goal to develop solutions tailored to your particular requirements.

Complex tasks can only be handled by teams. This team concept is symbolised by our F.I.T. shirts, because everyone from the engineer to the industrial mechanic contributes to the concept.

Soundly based training

Today, we are thinking about what you will need tomorrow. We therefore set the greatest store by training our "apprentices" to the highest standards and our corporate philosophy from the very beginning. That is how we ensure to have always skilled staff with detailed knowledge of our methods. It is not just our customers who appreciate the partner-like philosophy - our staff do, too.

Many of them have remained loyal to us for decades, and are glad to pass on their technical knowledge and valuable experience to you as well as to the youngsters in the company. You will be well satisfied with our company performance. Our in house customer service department and your local representative provide quality advice as well as installation, commissioning and maintenance of our systems to the highest standards.

And we offer many additional services.

Service hotline

If you have questions about the maintenance and operation of the systems, you can have confidence in the advice offered by our friendly staff on our service hotline.

Trouble-shooting service

We will never let you down! The experts in our trouble-shooting department will provide immediate support, on site, quickly and easily.

Spare parts service

We will supply spare parts rapidly and reliably, and of course with a practically unlimited guarantee of continued supply. The spare parts will be sent either from Germany or from the local sales office in your country. If required our express service will deliver the order you want by the following day (depending on the country).

In-house training programmes

Our high-tech Möhringer systems offer you a wealth of time- and money-saving options. In the training centre in Wiesentheid our experienced technicians and engineers will show you clearly how to operate the machines properly. You will receive valuable information on how to use the system rationally at your facility, in small groups and in a short time.

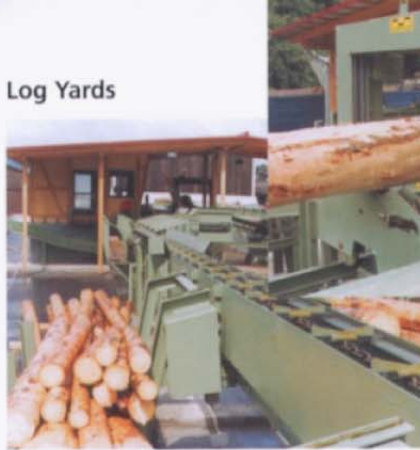

'Training on the Job' at site

We offer you also special training programmes at site. The goal of this training is to teach personnel and management under normal production situation how to organize, operate and maintain the sawmill in order to utilize the equipment in the most efficient way.
