Reviews

Some people have never experienced using a truly sharp tool, but when they do, they will find it takes less force to cut and it cuts so cleanly that the savings in abrasives alone are significant. Because Tormek regularly improves its system, that's the brand I selected. Try wet sharpening; like me, you will be amazed how much better your turning experience is.

Terry Martin
American Woodturner, USA

I have yet to find anything that cannot be sharpened on the Tormek. The honed edge is incredibly fine, and coupled to this dramatic improvement in edge quality is the not insignificant fact that the tools will last far longer, as the sharpening process is so much less aggressive. I am now a total convert to the wet grinding system. It really is Touch and Turn, but you touch far less often and turn far more!

Buying a Tormek is a safe investment in quality and performance. You will never have to put up with dull tools ever again!

✓ **Sharpen all your edge tools**
With the wide range of Tormek patented jigs, you can sharpen practically all types of edge tools. Tormek is dedicated to developing water cooled sharpening through innovative solutions!

✓ **Exact replication**
The key word when sharpening the Tormek way is *repeatability*. You can shape the tool exactly to your needs. Even complicated shapes such as fingernail turning gouges, spoon carving gouges and oval skew chisels with a radiused edge are easily sharpened.

✓ **Cleanest edges**
You finish the sharpening process by honing and polishing the edge on the leather honing wheel. You get a razor sharp edge.

✓ **Fast sharpening**
Once the shape is created, you remove only a fraction of the steel when re-sharpening, which makes it a quick job.

✓ **Full control**
At the low speed, you have full control of the sharpening and remove no more steel than necessary. An extra benefit is that your tools last longer.

✓ **No risk of overheating**
There is no risk that the edge becomes overheated and loses its hardness.

✓ **Safe and quiet**
Worn steel particles are deposited into the water trough, keeping the air clear of grinding dust. No sparks are produced that can be a fire hazard in workshops with a lot of wood dust. You will also find that the Tormek runs surprisingly quietly.

✓ **Quality and performance**
Buying a Tormek is a safe investment in quality and performance with a 7-year warranty.
