Specifications

The AC400 grinding machine is suitable to resharpen circular knives and counter-knives both in HSS and carbide. You can resharpen knives by means of a cup grinding wheel or a tangential grinding wheel.

Emulsion or full oil coolant

Touch screen with working cycles and possibility to install different parameters for roughing, finishing and spark out.

Axis controlled by step motors which allow programmable downfeed.

Speed rotation of the knives steplessly variable by means of a potentiometer.

Grinding wheel speed steplessly variable from 0 to 4500 rpm by means of a potentiometer.

Weight and measures are not binding.

We reserve the right to amend design and specification, without prior notice.
