

Manufactured in Germany.
Distributed Worldwide.

Size Reduction Since 1986

The image shows a close-up, low-angle shot of a building's exterior wall. The wall is composed of large, dark grey panels with visible rivets. The Weima logo is mounted on the wall, consisting of the word 'WEIMA' in a stylized, three-dimensional font. The letters are white with a dark grey shadow, giving them a 3D appearance. The background is a clear, bright blue sky.

We **love** shredding & briquetting!

Shredders and briquette presses bearing the WEIMA logo, exclusively developed and produced in our manufacturing plants in Germany, play a key role in applications all over the world. As a medium sized company, with **1,000 machines being sold annually**, and with more than **28 years of experience** in the field, our capacity for innovation and dedication for the best solution is paramount. We now have over **28,000 machines in operation** worldwide. Ultimately it is our highly-skilled team at WEIMA that secures an unrivaled quality and highest technology standards, ingrained into every produced machine, delivered and maintained worldwide.

Managing Partners

Shredding

Wood (e.g. pallets, lumber, softwood)

Plastics (e.g. PE, PP, PVC, PS, PU, P)

Waste (e.g. industrial, bulky, and p)

Metal (e.g. aluminum, copper, bra)

Paper and Cardboard (e.g. cellulose)

Wood, hardwood, chipboard, MDF)

PET, boxes, profiles, lumps, boxes)

Production waste, rejects, carpet)

Glass, profiles, tin, swarf, cuttings)

Paper, cardboard tubes, paper webs)

Briquetting

**MADE IN
GERMANY**

Superior **German** Engineering

Every WEIMA shredder and briquette press is manufactured by highly skilled employees in Germany exclusively. Our engineers are continuously testing, improving, and optimizing components and systems to the smallest detail.

From **small** single-shaft and four-shaft shredder

We deliver the optimal size reduction solution. With our broad range of shredder machinery we provide the capability to efficiently shred materials such as plastics, wood, paper and cardboard, metal, bio-mass, waste or data storage media.

Compact solutions. WEIMA briquette presses

Briquetting waste materials can reduce volumes by up to 90 %!

We literally have the ability to turn trash into treasure. Briquetting allows you to save money on expensive storage and production space. Briquettes are easier to store, lower an operation's fire risk and decrease transportation costs.

All models are noted for their robust construction as well as low maintenance technology. They can also be optimally integrated into your existing production line.

High density briquettes in various forms and sizes, made from wood, biomass, metal, plastics and more.

Think global, act local.

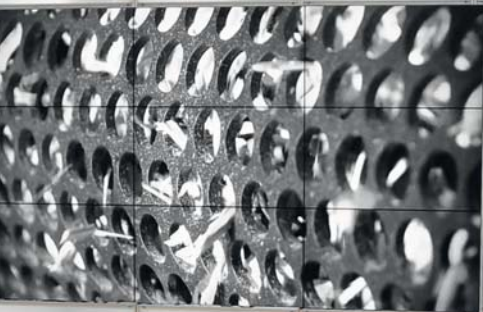

Each year, WEIMA and WEIMA suppliers exhibit WEIMA machinery systems and solutions at numerous regional and international trade shows. We look forward to welcome you at our booth!

WEIMA has been manufacturing shredding machines for over 28 years and for the most varied of tasks such as for customers from the plastics, wood, metal, paper and recycling industry all over the world. The WEIMA Group has 170 employees worldwide and sales outlets in Europe, the USA, South America and Asia.

The production programme includes single-shaft shredders, four-shaft shredders, granulators, briquetting presses and turnkey installations.
