Your trusted partner in cleaning machines

You can trust in Teijo

- Finnish manufacturer of industrial cleaning machines since 1967
- More than 14.000 machines delivered all over the world
- All machines are manufactured today in stainless steel

Wide range of standard and customized cleaning machines

- Top and front loading
- Single stage and multi stage
- Cabinets and tunnels

Teijo gives you real value

- Excellent cleaning results
- Reliable and easy to use
- Low life cycle cost

Value add to partner

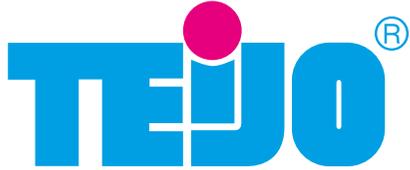

Easy to sell

Trouble free operation

Easy to take in use

Customer satisfaction

Benefits over the whole life cycle

Low operational costs

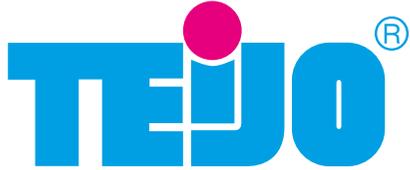

- Efficient insulation reduces heat loss
- Effective filtering and recycling extend the service life of the washing fluid
- Low maintenance costs and high usability

Safe and eco-friendly

- Closed washing fluid circulation
- Waste oil can be separated from the washing fluid
- Closed washing chamber prevents the working environment from steam and sprays

Long life time

- All washing machines made of stainless steel
- Long term availability for spare parts

Technical advantage

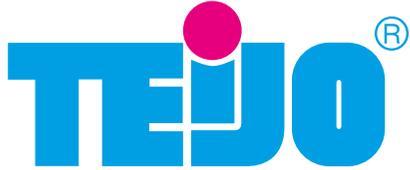

Advanced cleaning method

- Safe water-based cleaning method, not based on solvents
- Cleaning chamber where rotating spray piping sprays hot washing fluid
- Due to closed cleaning chamber no steam or sprays escape into the work environment

Savings in energy bill

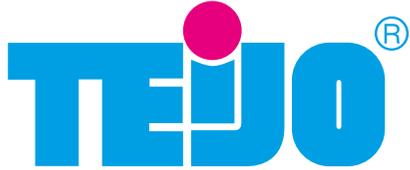

- Several options for heating
- Electricity, gas, district heating or even waste heat

Cleaning machines can be integrated into automated production lines

CASE – Purso Tools Oy, Finland

“We purchased a Teijo cleaning machine to replace two old single-stage machines. This enabled us to meet our customers’ increasingly-demanding quality standards.

Requirements were: higher cleaning efficiency, lower energy consumption, lower environmental burden.

We are extremely satisfied with our new TEIJO cleaning machine as well as the service we have received from Teijo.”

- Mika Aerikkala HSEQ Manager

Benefits to the customer

- Our quality demands have been achieved, and the number of customer claims has decreased significantly.
- Improved working safety and ergonomomy.
- Reduced water wastage.
- Increased energy savings.

Technical solution

- TEIJO
C-1600-22SS-PD1-MIU-SPEC
- Customised multi-stage cleaning machine
