## Components for surface technology

# Components for surface technology

Thanks to 40 years of experience in the field of surface technology and by using thermoplastics and composite materials, our tanks stand for quality and durability.

Of course we also deal with energy and environmental matters when designing our components. Thus we meet highest official requirements. The medium and the temperature determine the tank material and influence the statics. The design is made by us.

We are able to offer the following designs:

- PP
- PP-GRP
- PE
- PE-GRP
- PVC-GRP
- PVDF- GRP
- ECTFE- GRP
- Steel
- Stainless steel
- Thermal insulation

# Components for surface technology

Deliverable components:

- › Heat exchangers
- › Covers
- › Ventilators
- › Mounting blocks
- › Air injection devices
- › Lid systems
- › Collecting trays
- › Cascade systems
- › Overflow systems
- › Exhaust air piping
- › Suction channels
- › Pipeline systems
- › Pumps
- › Filters
- › Inspection systems
- › Flushing systems
