Product information

Zinc Chloride and Ammonium Chloride
for electroplating and hot dip galvanizing

As long-term reliable partner of the electroplating and surface engineering we offer first-class qualities at attractive conditions. Our main attention is turned to acquisition, quality control and supply.

Ex works Leipzig we offer:

- **Zinc Chloride** **white, crystalline powder in 25 kg bags**
- **Ammonium Chloride** **white, crystalline powder in 25 kg bags**

This water clear soluble salts are low in impurities and best for hot dip galvanizing and electroplating applications.

The above mentioned varieties are permanently available and therefor a supply in due time can be assured at short notice.

We will send you further information regarding the different products on demand.
Please feel free to contact us. Our collaborators will gladly be at your disposition.
