History

- 1947 Antonio and Riccardo Plateo together with Nicolò Guarini found "COFERMET Compagnia Ferro e Metalli Srl".
- 1962 Production site built up in San Donato Milanese, resulting in a 12.000 sqm built area.
- 1973 Start up of Technology Division. Thanks to the know-how of Ing. Carlo Pizzetti, Cofermetal develops the production of high-tech noise control materials.
- 1994 The 2nd generation takes over in the figure of Cristina Plateo. Cofermetal is the 100th company to obtain the Quality Certification according to the UNI EN ISO 9002 standard with RINA.
- 1995 Reunion of commercial and production activities in the headquarter of San Donato Milanese, with further expansion of the offices up to a covered area of 16.000 sqm.
- 2000 Continuity: the 3rd generation enters the Company. Cristina is flanked by her daughter Chiara Varesi.
- 2011 Modernization of the two historical foundries: a unified, more efficient and advanced production dept is created.
- 2015 In the context of the planned restructuring and reorganization of the Company, Chiara Varesi takes over the management of the company.
- 2017 Cofermetal obtains the EN ISO 9001: 2015 Quality Certification, embracing and implementing the risk and context analysis.

COFERMETAL Srl. is a highly diversified Company engaged since 1947 in the production and distribution of consumables for the Industry specifically in the fields of non-ferrous metal processing and industrial and civil soundproofing.

Metal Division

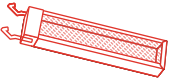

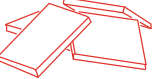

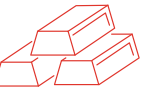

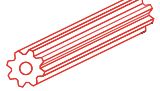

The **METAL DIVISION** produces semi-finished products of non-ferrous metals and their alloys for various industrial uses in the fields of Plating, Electronics and Electromechanical, in the fields of the Aluminum Anodic Oxidation, Constructions, Mechanics and of the Manufactured accessories in general.
