Introduction

The DUC-100 duct cutter is a practical solution for clean, accurate, and repeatable cutting of wiring ducts and duct covers in industrial electrical work. Designed for precision and ease of use, this industrial duct cutting machine helps improve installation speed, cut quality, and overall workflow efficiency.

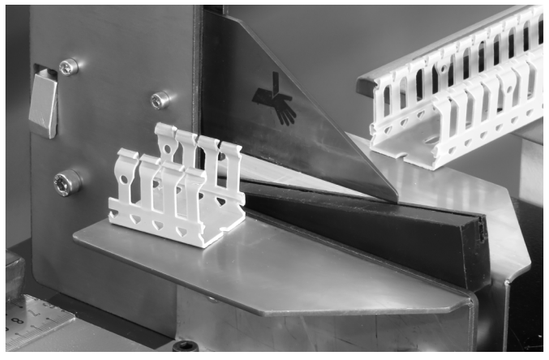

Advantages of Using the PAYAPRESS DUC-100 Duct Cutter

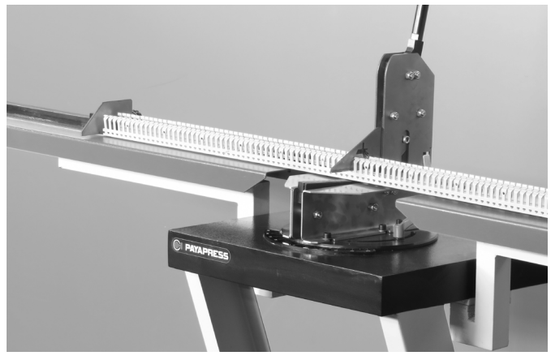

- Uniform cutting quality and cleaner edges for a better cable routing finish
- Reduced rework and faster installation thanks to precise length setting and angle cutting
- Higher safety compared to manual cutting tools
- Low maintenance cost due to the simple structure and durable HSS blade

Specifications

Technical Specifications of the Duct Cutter

Model	Function	Maximum Duct Width	Blade Material	Features	Surface Treatment
DUC-100	Cutting various sizes of duct and duct cover	Up to 100 mm	HSS tool steel blade	Equipped with a longitudinal stop for repetitive cutting and a rotating angle guide for angled and miter cuts (45° - 90°)	Electrostatic coating
